

BEST FAIRFIELD COUNTY CUSTOM HOME 7,000-8,000 S.F.

Hobbs, Inc.

This absolutely exquisite family home is set on a peninsula on Long Island Sound in Old Greenwich. It was designed by Gullans & Brooks in the shingle style with sweeping gambrel roofs, open porches and custom mahogany windows from Poland.

Outstanding features include: an elegantly detailed entry staircase, family room with wide plank oak floors; octagonal mud room with lighthouse organizer (*pictured at the beginning of this cover story*); a curved Ipe' side porch with a second curved porch off the second floor master suite; a beautifully detailed Palladian window in the master suite; a classic beadboard paneled master bath with split marble vanities, leaded glass windows and window seat pictured above and a semi-circular wall with built-ins and windows looking out to the Sound in an upstairs child's room (*pictured at left*).

Even with the required pile driving, hurricane bracing and strapping on this challenging site, Hobbs delivered an exceptional quality home on an tight construction schedule of just 10 months.
